

September 9th, 2019

The recent health events due to vaping is extremely concerning. We see these unfortunate events as an opportunity to educate retailers and consumers on the purity of our cannabis vapor cartridges.

Pearl Extracts is pure cannabis oil made in small batches in West Seattle. The only ingredients are cannabinoids and terpenes which we extract in-house from cannabis grown in Washington State. We will NEVER use vitamin E, cutting agents, glycol, glycerine, coconut oil ANY additives whatsoever. It's just cannabis.

We flavor our product with a broad collection terpenes that we extract from the cannabis plant. The majority of modern cannabis cartridges contain synthetic flavoring or natural aka "food-grade" terpenes isolated from non-cannabis plants in a laboratory. It is unknown how synthetic flavoring and isolated plant terpenes can affect the user. However humans have been inhaling the broad spectrum of terpenes contained in the cannabis plant for hundreds of years.

We care about the health of consumers and we only use cannabis that is good for humans and good for the earth. We use the product and take pride in it's purity. You can see our promise on the front of every box: just cannabis.

Please share this with colleagues and if you have questions please reach out at info@pearlextracts.com
